## External Coordination

Choose the section you want to jump in

An essential part of any CBI programme is the coordination with partners, government, Cash Working Groups and other key actors using CBI within the same context as your programme. Although it is an initial step, this practice and its outcomes will influence the implementation of the intervention as a whole. This step aims to ensure that IOM's engagement is welcomed and coordinated as appropriate. In most contexts where CBI is part of a humanitarian response, a Cash Working Group exists to support its effective coordination.
